

# THETA AI TRADER - Version 0.1 Foundation

## # THETA AI TRADER MANIFESTO

### ## Mission

Build an intelligent options trading platform that thinks before it trades.

### ## Core Philosophy

The trader defines the risk. THETA AI TRADER intelligently manages everything else.

### ## Principles

- Capital protection first
- Intelligence before execution
- Adaptive, not rule-based
- Explain every decision
- Production-quality engineering

## # THETA AI TRADER ARCHITECTURE

### Market Data

- > Market Data Adapter

## # PRODUCT ROADMAP

Milestone 1: Decision Intelligence Framework

Milestone 2: Trade Decision System

Milestone 3: Execution System

Milestone 4: Adaptive Position Management Engine

Milestone 5: Dashboard

Milestone 6: Paper Trading

Milestone 7: Live Trading

# ENGINEERING PRINCIPLES

- Type hints
- Unit tests
- Logging
- Documentation
- Clean APIs
- Configuration-driven behaviour
- Single Responsibility Principle

# DECISION LOG

1. User defines risk.
2. Software decides strategy.
3. Three operating modes.
4. APME is a core differentiator.
5. Explainable decision making.
